# Write & draw on your iPad intuitively with Pogo Connect

The multi-touch input surface of the iPad is fantastic, but it can't capture pen pressure like a graphics tablet can. Now artists can experience a true pressure-sensitive touchscreen stylus with the Bluetooth-enabled Pogo Connect. By wirelessly transmitting its tip's current pressure level, it tells the iPad how much pressure you're exerting to an amazingly exact degree. Use it with dozens of compatible apps to draw, paint, create... or even use your iPad as the perfect note-taking digital pad!

## *Slim-nibbed stylus is more precise*

Ready for a touchscreen stylus that writes, draws and scribbles just like a real pen? With a 2.4mm nib, the Pinpoint Stylus is four times thinner than most rubber styluses and unbelievably more accurate. It creates an electromagnetic field in the stylus tip that mimics the touch of a human finger. Write notes, sketch doodles, sign documents, edit photos and much more with a precise stylus you can use with any tablet and any app.
