

Experience the cosmos with a wireless telescope that you control with your phone

The Celestron 90GT Wi-Fi telescope introduces a fascinating way to explore the cosmos: just hold your phone or tablet up to the night sky. When you find an object you want to explore, tap the screen and the 90GT automatically slews to point right at it! A 90mm aperture, 910mm focal length and two eyepieces provide a maximum useful magnification of 213X, allowing you to see the rings of Saturn, the Great Red Spot of Jupiter, the Orion Nebula, the Hercules Globular Cluster and much more. While you look through the eyepiece, the SkyAlign app provides details of the distant object for further study.

Reveal the microverse with a Wi-Fi microscope

Stream real-time video from the handheld battery-powered illuminating MicroFi microscope directly to your tablet or phone. With a 640 x 480 CMOS sensor, the MicroFi can zoom in up to 80X to detect tiny details on everyday objects and stream live video to up to three devices simultaneously. Built-in LEDs provide adjustable illumination to get the perfect contrast. You can even use the MicroFi as a regular video camera by adjusting the lens configuration.

See what's going on at home, night or day

Ideal for anyone with kids, pets or parents at home, Belkin's NetCam HD lets you see what's going at home in vibrant 720P high-resolution video... right on your smartphone or tablet. The camera connects to your home's Wi-Fi router and streams video to the free NetCam app on your mobile device. Infrared night vision LEDs even show you what's going on after dark. You can even set up an e-mail alert that notifies you when motion is detected by the camera.

A clever twist on your surge protector

Don't sacrifice an outlet to bulky adapters. Rotate the sockets to where you need them with 360 Electrical. All four sockets turn and stay in position so you can fit a wide variety of large plugs. No wiring needed: just plug the protector into an existing grounded outlet. Choose between a 4-outlet version and one with 2 additional USB power ports for phones and tablets.

Stream to a second TV without wires

Now every TV input can be swapped between two TVs whenever you want. Just plug in up to five audio/video cables — from your cable box, game console, disc player or computer — into the 5x2 Matrix. It delivers one source to the closer TV by HDMI cable and then wirelessly sends a second source to another HDMI TV up to 100 feet away. Either TV can use any source... and you can use all your remotes at either station too. With a base station wireless transmitter and a satellite wireless receiver, it's easy to get a signal at that second TV, and it can even pass through walls.

Give your smartphone a place at your desk

Blending a phone stand and a traditional office phone handset, the POP Desk lets you make calls in comfort while allowing you to use your mobile phone for everything you use it for. The handset plugs into the audio port of your phone, making it compatible with just about every model. Anti-slip rubberized pads hold your phone securely at an angle... making it the perfect home base for recharging.

The coolest Qi charger

If your phone allows for Qi Charging — like the LG Nexus 4, the Lumina 920 or the HTC Droid DNA — just place it on the TYLT VÜ and watch it refill its battery, no cables to attach. Qi charging relies on magnetic induction to recharge compatible phones (Qi-compatible adapters too). The 45-degree tilted design lets you see your screen's phone while it charges (in either landscape or portrait mode).

Saidoka charging station integrates your iPhone with your work life

If your iPhone is always on your desk while you're working, it's time to make it official. The Saidoka is a charging station that provides an everyday home on your desk for your iPhone. Friction strips keep the dock firmly in place while a built in Lightning connector provides the power and data connections your phone needs. The Saidoka fits the iPhone 5 and iPhone 5S perfectly, but you can also remove the soft rubber lining to fit an iPhone 5C or an iPhone 5 or iPhone 5S in a case.

Use your computer like a touchscreen tablet

Do you ever find yourself swiping, pinching or rotating your mouse? The wireless Bamboo touchpad is designed to let you use touchscreen-like gestures on your Microsoft Windows or Mac OS computer. Use one, two or three fingers to navigate and control objects just like you're used to doing on your phone or tablet. The Bamboo also includes a pressure-sensitive stylus that helps you express yourself with handwritten notes, sketches or doodles.

Adjust the brightness, the position and the mood

The color of light — even the color of daylight — can affect how you function. Satechi's LED desk lamp lets you select the spectrum you wish to work or read in... just touch a button to change the light's "mood." You can also control the brightness level and the fully adjustable arm puts light where you want it... not in your eyes. The highly efficient and toxic-free LEDs consume only 1/8th the power of an incandescent lamp and are rated for 40,000 hours.

The dock that makes your iPhone a clock

250 1824
Snooze Bar, white
\$34.99

The multipurpose iPhone makes a great alarm clock, although it can seem like a bit too much to manage when you're half asleep. There's something nice about having a dependable stationary box with a clear display and a big snooze button that you can slap when you need to have 9 more minutes of sleep.

The Snooze is an attractively minimal solid wood dock for your iPhone 5/5C/5S or iPhone 4S/4 that holds your phone in a horizontal viewing position and includes a very functional snooze feature.

Grab the free Snooze App from the iPhone App Store to select your "alarm clock" screen type, brightness and snooze duration.
