

Networking

Connect Distant (12+ Miles!) Networks with Antenna-Installed NanoBridge M Routers

Built for rugged outdoor wireless networking, the NanoBridge M ("MIMO") routers can connect very distant networks with full 802.11n speeds. Conveniently built into a lightweight but high-gain dish, the bridges' powerful routers are easy to install and include built-in AirMax TDMA software, enabling scalable, carrier-class PtMP network performance. Completely weatherproof, the NanoBridge M routers only require a single CAT5e/6 network cable to be plugged into them... no need to bother with finicky coax connectors.

- InnerFeed antenna technology
- Complete radio system integration
- Designed for prolonged operation in harsh environments
- Enhanced RF and Ethernet ESD/surge protection

5 GHz

202 0351 & 202 0286
Antenna gain: 13 or 22dBi
Operating frequency: 900MHz or 5GHz
Processor: 400MHz Atheros MIPS 24KC
Memory: 64 or 32MB SDRAM, 8MB Flash
Wired network interface: 10/100 BASE-TX Ethernet (RJ-45)
Wireless protocol: AirMax/802.11n
Wireless approvals: FCC Part 15.247, IC RS210
Average transmission power: Up to 28 dBm
Reception sensitivity: Down to 96 dBm
Weight: 2.9 or 3.5 lbs
Max. power consumption: 5.5 or 6.5 watts
Max. throughput: 100+ or 150+ Mbps
Max. range: 16.6+ miles (30+ km)

2.4 GHz

5GHz

- Built-in airOS firmware & airView analysis software

202 0456 & 202 0459

Antenna gain: 18 or 25dBi
Operating frequency: 2.4GHz or 5GHz
Processor: 400MHz Atheros MIPS 24KC
Memory: 32MB SDRAM, 8MB Flash
Wired network interface: 10/100 BASE-TX Ethernet (RJ-45)
Wireless protocol: AirMax/802.11n
Wireless approvals: FCC Part 15.247, IC RS210, CE
Average transmission power: Up to 23 dBm
Reception sensitivity: Down to -94 dBm/-96 dBm
Weight: 3.5 lbs.
Max. power consumption: 5.5 watts
Max. throughput: 150+ Mbps
Max. range: 18.6+ miles (30+ km)

Note: Use in pairs for maximum point-to-point throughput. Operation may not be legal in all jurisdictions.

Outdoor 802.11 Routers Use Powered Integrated Antennas for Tremendous Range

The NanoStation Loco outdoor wireless routers include built-in 8dBi gain patch antennas that deliver a powerful semi-directional 802.11 signal. Designed for pole mounting, they feature up to 6 miles of range performance, 25+ Mbps of throughput performance, and the powerful, intuitive AirOS software. The weatherproof enclosure makes installation simple... thanks to the included PoE injector, the only cord to run to the NanoStation Loco is your Ethernet network cable.

2 1/2" L x 3 1/8" W x 6 1/2" H
including pole mount

- Maintains 13dBi of dual-polarity antenna gain
- Integrated patch array antenna

Note: Operation may not be legal in all jurisdictions. Includes PoE injector and zip ties. Wired router not included.

NEW

Protect Your NanoBridge Dish from Unwanted RF Energy

The RF Armor radome covers help shield your Ubiquiti NanoBridge from performance-reducing radio frequency energy. They install over your 12- or 16-inch antennas and help block radio waves from the back, sides, top and bottom, improving the quality of your radio signal. They don't increase the gain of your antennas, but they will lower the noise floor, providing cleaner signals and allowing for higher sustainable air rates.

Powerful & Compact Indoor/Outdoor 802.11b/g/n Access Points are Completely Reprogrammable

The PicoStation2 Wi-Fi access points are some of the most compact and powerful outdoor access points. With up to 1,000 mW of output power, one of these omni-directional routers can provide wireless coverage to over eight million square feet. Setup couldn't be easier: just plug a single network patch cable into the weather-proof enclosure. The included Power-over-Ethernet injectors combines power and data on the same line. The PicoStation2 models include hardware for wall or pole mounting.

- Includes powerful and intuitive AirOS software
- Open customizable Pico firmware
- 32MB SDRAM & 8MB flash memory
- 6dBi omni-directional antenna

802.11b/g, up to 100mW (20dB gain) output power

Outdoor 802.11g/n Router Uses Powered Integrated MIMO Antennas for Tremendous Range

The NanoStation M2 outdoor wireless router uses integrated 2x2 MIMO antennas to deliver a powerful semi-directional 802.11g/n signal. Designed for pole mounting, it features up to 9 miles of range performance, 150+ Mbps of throughput performance, and the powerful, intuitive AirOS software. The weather-proof enclosure makes installation simple... thanks to the included PoE injector, the only cord to run to the NanoStation M2 is your Ethernet network cable.

- Maintains 16dBi dual-polarity gain at 5GHz and 11dBi dual-polarity 11dBi at 2.4GHz
- Integrated patch array antennas
- Extra Ethernet port offers PoE output

The NanoStation M2 can expand your security network by extending the reach of your IP cameras.

Connector 1: 8P8C (RJ-45) 10/100 Ethernet jack (data/power in)
Connector 2: 8P8C (RJ-45) 10/100 Ethernet jack (data/power out)
Measurements: 1 1/8" L x 3 1/8" W x 11 1/8" H
Beam elevation & azimuth: 27° / 55°
TX power: Up to 28dBm
RX sensitivity: Down to -97dBm
Max. power consumption: 8W
Bandwidth: 2.412-2.462GHz
Wireless protocols: 802.11g/n/AirMAX

Includes PoE injector and zip ties.
Note: Operation may not be legal in all jurisdictions.

Networking

Build Open Mesh Networks Quickly & Cheaply with Modular High-Powered OM2P Series Access Points

Open Mesh networks utilize zero-configuration auto-linking wireless routers that each act as an access point, gateway and repeater. With only one router physically connected to the Internet, a mesh network is ideally suited for hotels, apartment complexes or shopping malls. The high-speed OM2P series routers allow both public and private SSIDs and includes a watchdog chip that automatically initiates reboots should it lock up.

- Dual SSIDs for private and open network
- Wireless bridge mode to connect a PC by Ethernet
- Customizable public splash page with authentication and payment options
- Cloud based control software with free perpetual license and automated monitors

Mesh networks are self-healing... should one router go down, the others reconfigure themselves to work without that router.

Experience 802.11n MIMO speeds with Revolutionary (and Affordable!) UniFi Access Points

The clean design of the UniFi 802.11b/g/n access point seamlessly blends into typical home and office environments. With 300Mbps MIMO technology and a range of up to 400 ft., the access point includes everything you need to install and manage it. Power over Ethernet (PoE) functionality makes for both a cleaner and easier install. Configure and manage any and all UniFi access points with the included easy-to-use controller software.

- No expensive Wi-Fi hardware controller/switch needed
- Intuitive setup and configuration
- Unified management system scalable to hundreds of APs

Measurements: 1 3/8" W x 7 7/8" diam.
Port: 8P8C Ethernet Auto MDX & PoE
Wi-Fi standards: 802.11b/g/n (2.4GHz only)
Antennas: Two integrated 2x2 MIMO
Power supply: 24V 1A PoE injector (included)
BSSID: Up to four per radio
Security: WEP, WPA-PSK, WPA-TKIP, WPA2 AES, 802.11i

Wireless Router Employs 3G/4G Wireless Modems as Failover when Wired Connection Drops

Every Internet connection hiccups or disappears at some point. In case of a failure with the wired network, Cradlepoint's Wi-Fi Branch Router immediately transfers your Internet traffic to one or more 3G/4G cellular modems with nary a bump in service to your connected clients. You can also use up to five 3G/4G connections simultaneously, along with up to five wired WAN connections, to maximize throughput for up to 128 Wi-Fi clients. A full-featured wireless router, the MBR1400 allows you to create up to four SSIDs with independent settings: great for separating and controlling private and guest networking.

202 0468

Wi-Fi protocols: 802.11a/b/g/n IPsec VPN sessions: 20 max.
Wi-Fi LAN clients: 128 max. Wi-Fi encryption: WEP, WPA, WPA2 & AES, with SPI & NAT
Max. Wi-Fi speed: 5GHz Max. Ethernet speed: 1Gbps
USB cellular modem ports: 3 ExpressCard modem ports: 2
WAN/LAN Ethernet ports: 5 Receive sensitivity: -69dBm typical
Max. SSIDs: 4 Measurements: 8 7/8" L x 5 1/8" W x 1 1/8" H

- Supports enterprise routing protocols (BGP, OSPF, RIP, VRRP)
- Protects connections with advanced Wi-Fi encryption, LAN segmentation & VLAN capabilities
- Supports more than 125 3G/4G (LTE, WiMAX, HSPA+, etc.) USB & ExpressCard modems

202 0467—The small business version of 202 0468 has many of the same features, including load balancing and automatic failover to 3G/4G.

202 0467

Wi-Fi protocols: 802.11b/g/n Max. SSIDs: 2
Wi-Fi LAN clients: 64 max. IPsec VPN sessions: 2 max.
Max. Wi-Fi speed: 150GHz Wi-Fi encryption: WEP, WPA, WPA2 & AES, with SPI & NAT

Create Wi-Fi Hotspots from Cellular Data Modems

NEW

5 1/4" L x 7 7/8" W x 1 1/2" H

Compatible with 4G and 3G cellular modems, the MBR95 mobile hotspot can give a whole group of computers access to the Internet. Just plug in a USB cellular modem and the MBR95 Travel Router will create a high-speed Wi-Fi hotspot for you and up to 31 colleagues. This model can also act as a standard wireless router and 4-port LAN router, accepting an Ethernet connection from a broadband Internet modem or router.

- Creates 300Mbps 802.11n Wi-Fi network
- Works with most USB cellular modems
- 4 10/100 LAN ports plus upstream WAN port
- Supports WPA2-CCMP (AES)

Includes AC adapter. Requires compatible 3G/4G cellular modem. See www.cyberguys.com for compatibility list.

WIRELESS 3G/4G ROUTER	1	5+	10+
202 0354 1 3G/4G USB port, 32 users	124.99	124.99	124.99

Optimize the Performance and Reliability of your Network with EdgeMax 3-Port Router

Housed in a compact, fanless form factor, the EdgeRouter Lite operates quietly as it delivers the powerful routing, security, and management features you require to efficiently run your network. Each Gigabit port functions as an independent interface, allowing you to configure Virtual Local Area Networks as your network segmentation requires. Set up multiple DHCP servers, easily control dynamic and static IP addressing, and conveniently track network activity and devices with multiple monitoring tools.

NEW

- Layer-3 base forwarding
- 1 million pps for 64-byte packets
- 3Gbps line rate across all three ports for 512-byte packets and higher
- Intuitive EdgeOS graphical user interface, plus Linux-based CLI

Measurements: 3 3/8" L x 7 3/4" W x 1 1/8" H
Processor: Dual-core 500MHz MIPS64 with hardware acceleration
System memory: 512MB DDR2
Flash storage: 2GB
Data ports: 3 10/100/1000 Ethernet ports
Serial console port: 1 RJ45 port

Includes AC adapter and mounting screws.

Multi-WAN Routers Allow You to Combine Multiple Internet Connections for Extra Speed

The Peplink Balance Multi-WAN routers let you combine multiple Internet links for faster throughput with all your clients. Multiple 8P8C ports allow for extra Ethernet uplinks, while a USB port on each allows you to connect a USB cellular modem for extra or backup bandwidth. The routers allow for bandwidth aggregation, link failover and per-application routing to keep all your traffic running smoothly. Deployment is easy and doesn't require any changes to existing firewalls or gateway routers.

Enterprise-Grade Dual-WAN 300Mbps Wi-Fi Access Point Easy to Install and Operate in Rugged Environments

NEW

Built for indoor use in rough environments, Peplink's 300Mbps access point is ready to install and connect all your Wi-Fi traffic. Two 100/1000 WAN ports keep traffic humming upstream while accepting Power-over-Ethernet, so you can install the router far from a wall outlet. Fully integrated with Peplink Balance, the AP One 300M is easy to configure, manage, and update from a single cloud-based interface. TruePower RF technology helps eliminate dead spots and interference wherever you deploy your network, and every channel runs at full power to give you greater Wi-Fi coverage with less equipment, maintenance and cost.

Includes AC adapter and 2 antennas. Note: Operation may not be legal in all jurisdictions.

Quickly Isolate RF Interference & Identify the Best Wireless Networking Channels with Wi-Spy USB Spectrum Analyzers

The pocket-sized Wi-Spy USB spectrum analyzer uses high-resolution and enhanced amplitude range to identify interference in the Wi-Fi-permitted public ISM bands. These easy-to-use tools, designed for IT professionals and wireless network consultants, help you troubleshoot and optimize your wireless networks. The included Chanalyzer software tracks and displays real-time RF activity in multiple visualizations to help you get the job done.

Dual Channel Wi Spy DBx

- Dual band range (2.4GHz & 5GHz)
- Field upgradable firmware
- RP-SMA antenna connector
- Bundled with Chanalyzer 4 Software

Frequency range:
2.4 to 2.495 GHz/5.15 to 5.85 GHz
Amplitude range:
-100dBm to -6.5dBm
Amplitude resolution: 0.5 dBm
2.4GHz Resolution bandwidth: 58.036 to 812.5KHz
5GHz Resolution bandwidth: 53.571 to 750KHz
Sweep time: 1.587 seconds max.
Antenna: RP-SMA

120 0231

2.4GHz Wi Spy 2.4x

- 2.4 to 2.495GHz frequency range
- Field upgradable firmware
- RP-SMA antenna connector
- Bundled with Chanalyzer 4 Software

Frequency range:
2.4 to 2.495 GHz
Amplitude range:
-100dBm to -6.5dBm
Amplitude resolution: 0.5 dBm
2.4GHz Resolution bandwidth: 58.036 to 812.5KHz
Sweep time: 1.587 seconds max.
Antenna: RP-SMA

120 0232

Pro Software

Chanalyzer Pro contains additional features over and beyond the basic Chanalyzer software, including waterfall navigation, support for multiple devices, data view saving, classification signatures and Wi-Fi sorting.

120 0234—Wi Spy DBx (120 0231) and Chanalyzer Pro Software

120 0233—Wi Spy 2.4 (120 0232) and Chanalyzer Pro Software

Pinpoint 2.4GHz Devices by Adding Device Finder to Your Wi-Spy

Use this portable directional antenna with the Wi-Spy spectrum analyzers to quickly track down offending devices. It's designed to clip onto a laptop so you can sample the wireless environment right in front of you as you roam the office or campus.

120 0222
Frequency range:
2.4 to 2.5GHz
Impedance: 50 ohms
Horizontal beam width: 60°
Gain: 7 dBi
Compatible Wi-Spy models:
Wi-Spy DBx, Wi-Spy 2.4x

Analyzers include dipole antenna. Requires Microsoft Windows (XP SP3 or newer) with Microsoft.net 3.5+.

Seal Outdoor Coax Fittings from Water & Corrosion with Flexible & Moldable Coax-Seal

Now available in bulk!

115 3162—½ in. x 5 ft., 1 roll
115 3174—½ in. x 12 ft., 4 rolls
115 3175—1 in. x 12 ft., 4 rolls

- Seals coax fittings from moisture & corrosion
- Offers years of protection from weather
- Adheres to all coax hardware and cable jackets
- Non-toxic, non-conductive & non-contaminating
- Forms and seals over odd shapes
- -200°F to 350°F temperature range

COAX-SEAL HAND-MOLDABLE SEALANT

	1	5+	10+
115 3162 1/2 in. x 60in, 1 roll	3.29	3.09	2.99

X-Sealant Inhibits Contact Corrosion in Harsh Environments

A specially formulated high molecular weight connector gel, X-Sealant provides corrosion protection for electrical contacts and connectors. Used as a dielectric compound and as a corrosion inhibitor, and suitable for indoor or outdoor use, X-Sealant is a multipurpose synthetic lubricant, containing anticorrosion particles. Apply X-Sealant directly to female and male connectors of any type.

- Remains pliable and won't harden or crack
- Environmentally friendly
- High dielectric strength

Digital Hotspotter Detects 802.11b/g/n Wi-Fi Networks

The Digital Hotspotter is a full-featured, second generation detection device for 802.11b/g/n networks. Beyond simply detecting signal availability, the Hotspotter also provides essential information about most wireless networks, including network ID, signal strength, encryption status and channel.

- Detect Wi-Fi without your computer
- Discover network ID (SSID)
- Encryption indicator

Requires 2 AAA batteries, included.

CANARY WIRELESS WI-FI DETECTOR	1	5+	10+
120 0211 802.11b/g/n	51.99	50.99	49.99

USB 2.0 Wireless Adapter with 5dBi Dipole Antenna

The portable WiFiStation wireless networking adapters can reach access points up to hundreds of feet away. They support 150 Mbps transfer rates and are compatible with 802.11g/n. Even if your laptop has built-in wireless networking, this USB adapter can provide extended speed and range when you need it most.

Frequency range: 2.4GHz, 5.15GHz, 5.725GHz
Adapter measurements: 1 1/2" L x 1 1/8" W x 5 3/4" H
Antenna measurements: 7 1/2" L
Output power: 30±2dBm
Operating frequency: 2.4-2.5GHz
Sensitivity: -75dBm (54Mbps)

Includes USB cable and software on a Mini-CD. Requires Microsoft Windows XP+. Operation may not be legal in all jurisdictions.

UBIQUITI MIMO NETWORK ADAPTER	1	5+	10+
202 0288 1000mW, WiFiStationEXT	39.95	38.95	37.95

Fit Your Wi-Fi Adapter in Your Pocket... or Just Leave it Plugged in all the Time!

This tiny Wi-Fi adapter for desktop PCs or laptops can reach data transfer speeds of 150Mbps when used with 802.11n devices. Since it is also backwardly compatible with 802.11b/g, you can use it to connect to almost any wireless access point.

It's that tiny.

- 64/128-bit WEP, WPA, WPA2 (PSK, TKIP, AES)
- 2.4-2.483GHz frequency band
- Access point option

Includes software CD-ROM. Requires Microsoft Windows XP+ and USB 2.0 port.

WIRELESS ADAPTER	1	5+	10+
202 0409 Nano 150N, USB	21.72	20.79	19.99

Bring Dual Band 300N Wireless Connectivity to Your Computer

The EnGenius Dual Band USB Adapter uses advanced 802.11n Wi-Fi technology to bring superior range and blazing wireless speed to your laptop or desktop computer. The 300Mbps maximum transfer speed is made possible by communicating on both the 2.4GHz and 5GHz band simultaneously. Network up to twice as far and six times as fast compared to 802.11g.

Measurements: 3" L x 3/4" W x 3/4" H
Wi-Fi type: 802.11a/b/g/n
Form factor: USB 2.0
Security: WEP, WPA, WPA2 (AES)
Connection protocol: 802.11n
Max. rate: 300Mbps

Pocket-Sized Surf-On-The-Go Travel Router Creates a Hotspot from a Wired, Wi-Fi or Cellular Connection

With four operating modes, the pocket-sized Surf-On-The-Go Wi-Fi router connects an unlimited number of devices to the Internet. The router makes a Wi-Fi hotspot from a single Ethernet, Wi-Fi or USB cellular modem connection. You can also use it to convert Ethernet devices like game consoles or printers into Wi-Fi devices.

see full specifications at
cyberguys.com

Choose your connection:
Surf-On-The-Go connects to your upstream network by Wi-Fi, Ethernet, or a USB 3G/4G cellular modem

- Support for PPPoE, static IP, DHCP
- WAN link health check
- Automatic failover to cellular
- Supports WEP, WPA, WPA2 & 802.1x
- Multiple Wi-Fi profiles
- Background scanning
- DHCP server for LAN clients
- Always-on Wi-Fi access point
- Port forwarding
- Port-based QoS

Includes power adapter, window mounts and network cable.

Add a 10/100 Ethernet Connection Without Pulling a New Patch Cable!

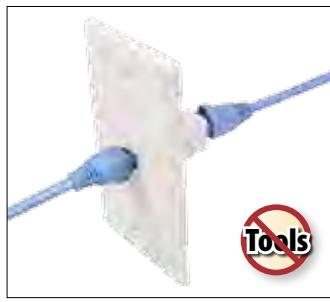

Our popular Y splitters let you connect two computers to two switch ports on your switch or hub through a single patch cable. This is accomplished by utilizing two pairs of wires in standard network cable that are unused by 10/100 Ethernet. It's like doubling a network connection without pulling a new cable!

NETWORK PAIR SPLITTERS, CAT5E	1	5+	10+
202 5277 10/100, 2 pk.	13.99	13.67	13.51
120 6512 10/100, shielded, 2 pk.	14.99	14.21	13.83

Forget Wiring Wall Jacks... Just Run Completed Patch Cables & Use these Faceplate-Ready Couplers!

These in-line couplers mount directly in standard faceplates and allow you to connect your network cables directly! There's no need to wire in jacks and no punch tool required. Simple and fast!

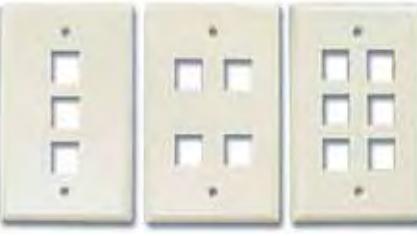

Connect a network cable to the inline coupler, then plug the coupler into a standard faceplate. Faceplates sold separately.

Crossover Inline Couplers

Make an Ethernet crossover connection with standard patch cable and these simple adapters. Using a simple PCB inside (not wires) for maximum signal integrity, you can reliably network two computers together without using a special crossover cable.

CROSSOVER INLINE COUPLER	1	5+	10+
180 0525 CAT5e, black	5.19	4.91	4.75
180 0529 CAT6, green	5.19	4.93	4.78

8" Crossover Adapters

Adapters with built-in crossover cable to connect 2 computers or hubs together.

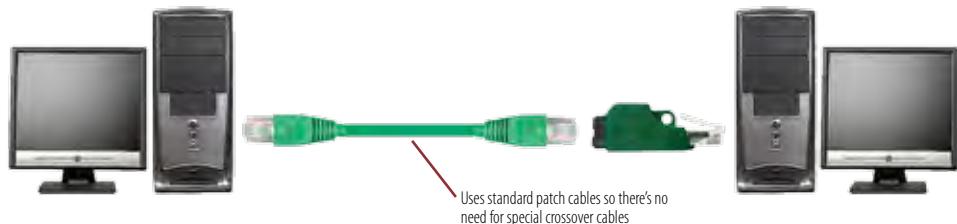

CROSSOVER ADAPTER	1	5+	10+
120 6138 CAT5e, 8 in.	4.39	4.13	3.98
120 6140 CAT6, 8 in.	4.39	4.14	3.99

Connect 2 PCs Without a Hub Using SuperLooper Crossover Adapters

SuperLooper Crossover Adapters convert standard patch cables into crossover cables which you can use to network two computers together without a hub. They're great for starting a home network and handy for PC technicians and network specialists.

Network two PCs without a hub

	180 0508 For 10/100 Ethernet • CAT5/5e/6 compatible • RJ-45 jack & plug
	180 0492 For 10/100/1000; RJ-45 • Gigabit compatible • RJ-45 jack & plug
	180 0512 For T1/E1; RJ-48 • T1/E1 (DS1) compatible • RJ-48 jack & plug

Complete Crimping Solution

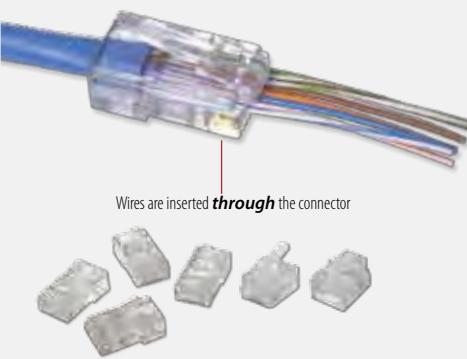

EZ-RJ45 Crimp Tool Provides Simple Wire Sequence Verification Before Crimping

The EZ-RJ45 Crimp Tool is designed to quickly crimp and cut the wires of a EZ-RJ45 compatible connector in one simple operation! The ratcheted straight action crimping motion ensures a uniform crimp every cycle. It features precision cast crimping dies for superior accuracy, a built-in wire cutter and stripper and a steel frame with rust resistant black oxide finish.

113 3212
EZ-RJ45 Crimp Tool

EZ-RJ Connectors & Strain Reliefs

Wires are inserted **through** the connector

Cable jacket is seated tightly in the connector

- 50 microinch gold-plated connectors
- For solid or stranded wire
- Compatible with most crimp tools except AMP

Heavy-Duty EZ-RJ Crimper Designed for Thicker Shielded Cables

The EZ-RJPRO HD crimp tool is perfect for working with shielded cables that are tough to terminate due to larger wire gauges. This tool gives you a ratcheted, high-leverage and stable platform for consistent terminations.

Enhanced Twisted Pair Cable Tester

Intellinet's enhanced network cable tester with remote terminator will quickly diagnose your most common 10BaseT cabling problems. Compatible with 10BaseT, AT&T 258A & EIA/TIA 568 wiring, it automatically scans each wire pair and identifies problems with LEDs. The included remote makes it easy to test installed wiring.

INTELLINET

Requires 9V battery, not included.

Wi-Fi Multimeter Links to Your Smartphone or Tablet for Tremendous Functionality

The iDVM Multimeter is the first digital iOS- and Android-enabled voltmeter that allows you to easily capture, store and share data! The iDVM makes measuring and utilizing voltage, current and resistance data much easier with unique, advanced features like data export, web connectivity, on-device graphing functions and integrated speech. The iDVM can facilitate your work, save you time, and increase your productivity!

- Connects via ad-hoc Wi-Fi network
- 300V DC or 300V RMS AC maximum voltage
- Surge protection up to 8kV
- Fuses for 400mA and 4A input
- User-definable refresh rate up to 20Hz
- Audible measurement reading intervals
- Can send data over e-mail
- Made in USA

iPhone not included.

Instantly Check for Breaks in Your Network Wiring by Simply Plugging in a SuperLooper Loopback Tester

Use the SuperLooper Loopback Jack & Plug together with your switch or hub to check for breaks or shorts in your network wiring. When plugged into a wall jack or onto a network cable, the loopback completes a circuit to your switch or hub. If the "connection" LED on your switch or hub lights up, your cable is OK. It's that simple!

Use with a switch or hub to check for breaks in cables

If the hub/switch light goes on, cable is OK!

Multi-Channel Wire Stripper Quickly Bares Wire of Network Cables

With a clamshell-like design, Knipex's cable stripping tool cuts and removes the jacket off of CAT5, CAT6 or CAT7 UTP and STP cables with diameters between 4.5 and 10 millimeters. Just place a cable into the central channel, then squeeze and pull. It also includes six supplemental strippers for wires between 24 and 12 AWG.

Made in Germany

Mini Wall Mount Patch Panel CAT6, 12-Port

Use this reduced-size CAT6 patch panel when space is at a premium. The panel easily disconnects from the cradle for rewiring. It can be wall mounted vertically or horizontally. Made in USA.

Punchdown tool included

1 7/8" L x 3 3/8" W x 10" H

MINI WALL MOUNT PATCH PANEL	1	5+	10+
162 0501 CAT6, 12-port	19.95	19.39	19.23

CAT5e Rackmount Patch Panels

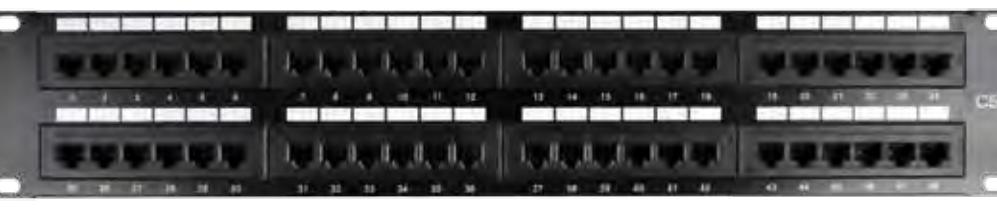

These patch panels feature top-entry punch blocks for easy cable management. Engineered for 19-inch racks, these panels are UL listed and CAT5e certified, featuring 110D connectors, and can be used with both T568A and T568B-type installations. Made in USA.

180 0730—12 Port, 1U

180 0735—24 Port, 1U

180 0740—48 Port, 2U

- Gold-over-nickel terminals for superior conductivity
- Punch blocks Krone or 110D compatible
- Printed T568A and T568B wiring reference guides

Each includes punch tool, block covers, 2 cable managers and zip ties.
Rackmount hardware not included.

PATCH PANEL	1	5+	10+
180 0730 CAT5e, 12-port	19.95	19.34	19.16
180 0735 CAT5e, 24-port	24.95	24.16	23.93
180 0740 CAT5e, 48-port	45.95	44.56	44.14

Rackmount Wire Organizers

Make your cable looms neat, organized, easy to manage, and easy to troubleshoot with these cable organizers, designed for 19-inch racks. Simply slip cables onto the hooks and route them to their destinations. Made in USA.

RACK WIRE MANAGER	1	5+	10+

180 0807 7U, 12 in. depth	44.95	43.87	43.55

Networking

Remote Reboot & Power Control via the Web

Remotely control the power state of your equipment with the Web Power Switch. Eight of its 10 sockets can be controlled from an internal Web server... meaning you can control the power of your machines from anywhere in the world. Using IP-based logins guarded with customizable port numbers, subnet restriction and password security, you can control the power states of each switch remotely, and even write sequenced start-up scripts.

NEW

Latest version features removable power cord, a built-in calendar/clock, and support for mobile devices. Android and iOS apps available from www.digital-loggers.com/mobile.html

- Automatic internal auto-ping monitor
- BASIC scripting language
- Syslog reporting
- Internal high-current MOV surge protection
- Higher memory capacity
- LCD displays status for each outlet

Keep Your Rack Equipment Humming Happily with Filtering & Non-Filtering 1U Power Distribution Units

Each switch lights when active

112 0406

Rating: 20A/120V/2400W

Outlets: 10 in back

Notes: Individual, front-mounted, light-up rocker switches for each outlet

This unfiltered power distribution rack (PDU) provides up to 15 amps of power to multiple devices. As it does not employ surge protection or power wave modification, it is typically used with an alternate waveform UPS or generator power.

Fixed mounting flanges provide a solid rack mount installation

112 0403

Rating: 15A/125V/1875W

Outlets: 2 in front; 10 in back

Notes: EMI/RFI filtration on all 12 outlets

With network-grade surge protection and noise suppression, this power strip bar distributes EMI/RFI-filtered electricity to 12 AC outlets.

Lighted switch with latching safety cover prevents risk of accidental shut-off

112 0407

Rating: 15A/120V/1800W

Outlets: 10 in front; 10 in back

Notes: Lighted switch with latching safety cover reduces risk of accidental shut down.

RACKMOUNT POWER MANAGER, 1U	1	5+	10+
112 0406 10-outlet w/switches	97.95	93.78	90.49
112 0403 12-outlet, 1800 joule	61.79	59.56	58.44
112 0407 20-outlet	53.95	53.54	53.10

This unfiltered power distribution rack (PDU) provides up to 15 amps of power to multiple devices. As it does not employ surge protection or power wave modification, it is typically used with an alternate waveform UPS or generator power.

Use Non-Conductive Cable Standoffs to Cleanly Install Cables Along Walls or Beams

Non-conductive cable standoffs and supports make it easy and safe to run cables along walls or beams. They help provide a safe distance between the building surface and the cables.

● Sold as 100 pack

More non-metallic cable standoffs available online cyberguys.com

NON-METALLIC CABLE STANDOFFS	1	5+	10+
